How big is Vietnam's wind energy sector?

Vietnam's wind energy sector has seen remarkable growth in recent years. As of 2024, offshore wind is roughly 5GW of installed capacity, a significant increase from just a few hundred megawatts in 2020.

What is Vietnam's wind energy potential?

According to recent studies, Vietnam's total wind energy potential is estimated to be around 600 GW, with offshore wind accounting for a significant portion of this figure. For more information, you can explore further details on the Wind Energy

What is Vietnam doing about wind power?

The Vietnamese government has set ambitious targets for renewable energy development, including wind power. The National Power Development Plan VIII aims to increase the share of wind energy in the country's power mix to 30,9 - 39,2% by 2030. Supportive policies, such as feed-in tariffs and tax incentives, encourage sector investment.

Who invests in Vietnam's offshore wind energy?

The leading investors in Vietnam's offshore wind energy appear to be European corporations. The Japan-led Asia Zero Emission Community initiative aims to provide USD \$8 billion for energy projects in Indonesia, the Philippines, Thailand, and Vietnam.

Vietnam is a developing, mainly agrarian country that is moving from a centrally-planned economy to a market economy. Political control rests with the Communist Party.

With a large technical potential for renewable energy, the share of solar and wind power in the electricity generation has grown rapidly in the past few years, from almost no renewable ...

Vietnam is transforming its power system with an increasing share of variable renewable energy (VRE1) in

the generation mix and plans to achieve 27% VRE by capacity in 2030 and 42% by ...
