Our modular and customized approach allows us to design solutions that adapt to any challenge, from drinking water treatment to wastewater management. We offer three types ...

By providing a turn-key system with all internal plumbing and wiring complete prior to delivery, our containerized systems allow water treatment to be accessible, convenient, treatment delivery ...

Discover why water innovation across the world is now central to business strategy, regulatory action and the structure of the water technology market.

The KLARO container.one is a fully biological wastewater treatment plant using the SBR method (= sequencing batch reactor with activated sludge) with simultaneous aerobic ...

The world is facing a water crisis - it's estimated that by 2030 global demand for water will exceed sustainable supply by 40%. Water is a highly complex and fragmented area. ...

Japan is reimagining water infrastructure with tech, transparency, and collaboration to boost resilience amid ageing systems and climate challenges.

Discover custom container power generation and portable water purification solutions--ideal for renewable energy, emergency power, and mobile utility needs.

Water scarcity, pollution and extreme weather events driven by climate change, population growth and industrial demand are pushing global water systems to critical levels. ...

The world is facing a growing challenge of water scarcity, which is set to accelerate this century. While

already in use in manufacturing and agriculture, digital twins could also be ...

Modular, mobile water treatment solutions that integrate easily into your process. With fast availability, plug & play setup, and options to rent, lease, or buy, you gain flexibility and control. ...

The ClearFox™ Containerized System is a packaged wastewater treatment plant, custom designed and pre-installed within ISO shipping containers. As a modular solution, it is easily ...

This report outlines key pathways to strengthen water resilience, through private sector and multi-stakeholder action, and secure the future of water for society and the global ...

We produce modular water treatment systems based on standard containers of 20 and 40 feet, in individual sizes, as well as modular systems on frames.

Looking for mobile water treatment systems? Veolia has you covered with portable temporary water treatment plants & filtration systems to cover any situation.

Data centres cause accelerating water usage, requiring innovative water circularity solutions; however, collaboration will be critical for their success.

Protecting the global water cycle can help us achieve many of the SDGs. Here's how public-partnerships can unlock innovative solutions for a sustainable future.
