Does Sweden have 5G?

5G deployment is underway in Sweden. In October 2023, 92% of the population had coverage from 5G networks. The government has not imposed any requirements on operators regarding the deployment of 5G, but there are coverage requirements in various frequency bands in order to improve mobile coverage in Sweden.

Where are Northstar 5G networks being built?

Dedicated Northstar 5G networks from Ericsson with key technologies are now being established at four strategic locations in Sweden. With the help of EU funding, RISE and Telia are building advanced 5G networks for pioneering large-scale projects for digital innovation in important areas of society such as transport and logistics and agriculture.

Can a company use a radio transmitter for 5G?

Starting 1 January 2023, companies have been able to apply for local licences to use radio transmitters in the 3.7 GHz and 26 GHz bands, which may be used for 5G. This enables local 5G networks in industrial sites, mines, harbours, hospitals and other special premises.

Does Sweden need a 5G licence?

The government has not imposed any requirements on operators regarding the deployment of 5G, but there are coverage requirements in various frequency bands in order to improve mobile coverage in Sweden. There are no specific licence conditions for the roll-out of 5G.

Starting 1 January 2023, companies have been able to apply for local licences to use radio transmitters in the 3.7 GHz and 26 GHz ...

During recent years there is an on-going deployment of 5G base stations for radiofrequency [RF]
