Reykjavik's pioneering work in geothermal and hydroelectric energy has established Iceland as a global leader in renewable energy. This leadership extends to exporting technology and ...

Reykjavik's energy efficiency is legendary, and it all boils down (pun intended!) to Iceland's geothermal energy. Forget expensive, polluting heating systems; houses and ...

In recent years, there have been seven volcanic eruptions in Reykjanes - a number that might rise even higher. The geothermal areas of Krysuvik and Seltun have walkways and ...

NVZ, the largest of all of them, runs from Akureyri to Reykjavik. There are many volcanoes along this rift, including Krafla, Fremri-Námur, Askja, Tungnafellsjökull, Hekla, Vatnafjöll, Katla, ...

Geothermal energy utilization in Hveragerði and its effect on the Varmá river Veitur improves energy efficiency with new equipment and reduces emissions.

Heating in Reykjavik is currently supplied by hot water from the Nesjavellir and Hellisheði power plants, as well as four low ...

Reykjavik's pioneering work in geothermal and hydroelectric energy has established Iceland as a global leader in renewable energy. This ...

The power plant's location near Reykjavik makes it an easy addition to your itinerary. Pair your visit with a hike in Reykjadalur, a soak in a natural hot spring, or a tour of the Golden Circle.

Heating in Reykjavik is currently supplied by hot water from the Nesjavellir and Hellisheði power plants, as well as four low-temperature areas in Mosfellsbær (Reykjum and ...

Iceland is the first country in the world to create an economy generated through industries fueled by renewable energy, and there is still a large amount of untapped hydroelectric energy in ...

We operate fifteen hydropower stations, three geothermal power stations and two wind turbines for research purposes in five operating areas in Iceland.
