How are companies classified based on their energy source?

Companies in the sector are classified based on their energy source, such as non-renewable (e.g., oil, natural gas) or renewable (e.g., solar, wind). The sector is critical to industrial growth and varies considerably due to fluctuating energy prices driven by global supply and demand.

What is the energy industry?

The energy industry refers to all of the industries involved in the production and sale of energy, including fuel extraction, manufacturing, refining and distribution. Modern society consumes large amounts of fuel, and the energy industry is a crucial part of the infrastructure and maintenance of society in almost all countries.

What do energy companies do?

From extraction to distribution, these companies ensure the availability of energy sources like oil, gas, and renewable resources, powering homes, transportation, and industries. The energy sector encompasses companies involved in the production and distribution of energy, from fossil fuels to renewables.
