-----  
Can you measure a base station if you're in a 3G network?

You can only measure stations in the network you are actively connected to, so for instance you can't locate a 4G base station if you are in a 3G network. Usually 2G/3G/4G/4G+cells can all be in the same base station, and even be sent from the same panel antenna.

Can 2G cells be in the same base station?

Usually 2G/3G/4G/4G+cells can all be in the same base station, and even be sent from the same panel antenna. The application can show that a base station can cover areas up to a hundred kilometers.

How to find a base station?

Base station location in urban areas is best determined by doing round trips of city blocks. At more rural locations you should do larger sweeps to save time. You will get the best result on flat ground. Ensure that you have a sufficiently good connection to the base station as well as a GPS connection.

Austrian operator A1, in partnership with Nokia, has launched Austria's first 5G mobile site with mmWave technology in Vienna.

OpenCelliD is the largest Open Database of Cell Towers & their locations. You can geolocate IoT & Mobile devices without GPS, explore Mobile Operator coverage and more!

For more details on 5G coverage by operator, see traditional nPerf maps.

in Austria For The Time Being Government Measures to Promote 5G What Does 5G Bring Me? Although 5G will certainly be designed with a focus on business and industry at the beginning, the fifth generation of mobile communications will also bring some advantages for private users. As the basis for new customer experiences, such as augmented reality, 5G also supports the digitization of many areas of life. Wherever many people come together... Setting a DAS to any other type will restore the main tower and delete the individual DAS elements. CellMapper is a crowd-sourced cellular tower and coverage mapping service.

According to the strategy paper, base station locations will have to be condensed because 5G transmits in a higher frequency range and therefore has a shorter range.

This map represents the coverage of BASE 2G, 3G, 4G and 5G mobile network in Vienna. See also : BASE mobile bitrates map in Vienna, and mobile networks coverage in Vienna.

The base station is marked on the map as a red pin in mobile and a red arrow in a browser. A blue pin refers to your own location and the black line tells you which station you are ...
