What float glass products does AGC offer?

AGC offers extra clear float glass products for a broad range of solar applications. Your single source: High-efficient float glass production, glass coating, glass processing as well as high-capacity production of flat solar mirrors. Everything is highly automated, precise and efficient. Ability to scale up to meet your project-driven demand.

Which float glass is best for solar applications?

Arsenic- and antimony-free extra clear float glass for solar applications. SunMax Premium is exclusively produced in a float glass process. The industrial float glass process adheres to very strict production tolerances and guarantees the lowest possible defect density. Read more about some of our recent selected finished success stories.

What are the applications of solar control glazing?

The applications for solar control glass are wide-ranging. From windows, facades and curtain walls to roofs and skylights, in fact, any application where glazing is a physical barrier between the inside and outside of a building, solar control glazing can be considered.

What is solar control glass & how does it work?

In terms of thermal insulation performance, most of our solar control glass products - those with at least one silver coating, help reflect indoor heat back into the room and form a shield against the cold exterior. Used in double or triple glazing, they help reduce energy costs associated with indoor heating systems.

Our analysts track relevant industries related to the Monaco Solar Control Glass Market, allowing our clients with actionable intelligence and reliable forecasts tailored to emerging regional needs.
