---

Solar capacity is forecast to grow 9% in 2025, while wind is expected to jump 21%. And China is way ahead of everyone - it's expected to install 66% of the world's new solar and ...

Clean energy momentum builds as solar and wind outpace global electricity demand growth Solar and wind are now expanding fast enough to meet all new electricity ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity. The Oasis de Atacama in Chile will ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already ...

The global energy market is set to witness significant shifts in renewable energy in 2025. Learn what trends, challenges, and ...

The global energy market is set to witness significant shifts in renewable energy in 2025. Learn what trends, challenges, and opportunities experts forecast.

Driven by immediate needs, the industry in 2025 will also be increasingly deploying currently available solutions, such as storage, clean hydrogen and wind and solar.

The U.S. is on track to add 60 GW of clean energy capacity in 2025, according to developer projections. If those numbers hold, that would represent 26% growth, compared to 2023's ...

Explore what 2025 holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights ...

Solar capacity is forecast to grow 9% in 2025, while wind is expected to jump 21%. And China is way ahead of everyone - it's ...

For supporters of the energy transition, 2025 had plenty to complain about: the scrapping of U.S. clean energy policies, wind droughts in Europe, corporate retreats from wind ...

Driven by immediate needs, the industry in 2025 will also be increasingly deploying currently available solutions, such as storage, ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

Explore what 2025 holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights from FFI Solutions.
