-----  
What is a glass/glass Polly/monocrystalline module?

Glass/Glass polly/monocrystalline modules with unique Glass/Glass design and thermo-sealing protection at all perimeter of the module ensuring superior robust protection against UV, humidity, ammonia and salt corrosion. Safety laminating is ensured by PVB foil.

What is a double-glass module?

Double-glass modules are characterized by increased reliability, especially for large-scale photovoltaic projects. They include better resistance to higher temperatures, humidity and UV conditions, and have better mechanical stability, reducing the risk of microcracks during installation and operation.

What is the difference between a glass/glass module and a standard module?

Compared with standard modules, the same glass material resistance and heat dispersal is more durable in fluctuating temperatures and hot climate zones, ensuring a 50 year lifespan. Unlike other Glass/Glass modules on the market, ViaSolis uses innovative edge-sealant technology to protect PV cells from humidity.

The Zagreb factory represents the future of solar manufacturing - where precision engineering meets environmental responsibility. Whether you're planning a rooftop installation or a solar ...

Find out all of the information about the Phototrade S.r.l. product: monocrystalline silicon photovoltaic module . Contact a supplier or the parent company directly to get a quote or to ...

Double Glass is especially important in photovoltaic facilities such as solar power plants and with the expected long service life of modules such as AKCOME, Jinery or Jolywood.

This monocrystalline photovoltaic panel aims to revolutionize the solar industry with its cutting-edge features and superior performance. M575-N-D modules are manufactured using N-type ...

Mogen Solar MG10 Perc monocrystalline single glass 540-555Watt photovoltaic solar panel. The new series integrates 182mm silicon wafers, with perc, multi-busbar cell technology and high ...

Double glass modules use an innovative design with glass on both sides, offering higher photovoltaic conversion efficiency and better environmental characteristics.

630W double-sided double-glazed PV module adopts high-efficiency monocrystalline silicon cells with double-sided power generation capability, featuring high transmittance, long service life ...

This monocrystalline photovoltaic panel aims to revolutionize the solar industry with its cutting-edge features and superior performance. M575-N ...

ViaSolis manufactures glass/glass solar modules, featuring high panel efficiency, excellent durability and innovative design market.

As a professional manufacturer, we produce high efficiency Bifacial Double glass solar modules, from 400watt to 700watt solar panels . All pv modules follow the standard of TUV, CE, ...

Mogen Solar launched a new generation of ultra-high efficiency HJT solar modules, monocrystalline N-type HJT bifacial double glass 620w-640w ...

Mogen Solar launched a new generation of ultra-high efficiency HJT solar modules, monocrystalline N-type HJT bifacial double glass 620w-640w Watt photovoltaic solar panel. ...

Mogen Solar MG10 Perc monocrystalline single glass 540-555Watt photovoltaic solar panel. The new series integrates 182mm silicon wafers, ...
